Key Qualifications :

Summary of Experience and Training:

I am an experienced web, mobile, and AI developer with 11 years of experience. I hold a Master1 degree in Software Engineering. My expertise lies in web platform development, cross-platform mobile app development, artificial intelligence, and Web API integration.

I have worked on various notable projects with the AGILE methodology, including the development of Clack (a generative AI available on WhatsApp), LifePlay (a VOD and streaming mobile app) and more than 50 other significant web and mobile projects.

- **Mobile Application Development:**

  - ✓ React, Apache Cordova, NodeJS, JavaScript, iOS SDK, Android SDK, Firebase SDK

- **Front and Back Web Development:**

  - ✓ HTML, CSS, JavaScript, PHP, Laravel, Rest API

- **Artificial Intelligence (Generative AI, Computer Vision, Machine Learning, NLP) :**

  - ✓ OpenAI SDK, Google Dialog Flow, MS. BOT Framework, IBM Watson, Google Cloud

- **Database Management System:** MySQL, SQLite

- **Virtual Reality to showcase virtual exhibitions :** Matterport, Unity3D, WebGL

- **IDE:** Android Studio, X-Code, Visual Studio Code, Unity

- **Portfolio :** My portfolio is available on my website https://fonan.dev/works

Responsibilities Exercised:

Throughout my career, I have held several positions of responsibility. Currently, I am the CEO of Pollygone, a technology company that I founded in 2019. Prior to that, I served as the Technical Director and then Deputy General Manager at DYS Communication. I also worked as a Lead Developer at Vizion Digital Media.
